COURSEWORK

UNDERGRADUATE
Object Oriented Programming
Operating Systems
Information Retrieval
Neural Networks &Fuzzy Logic
Computer Graphics
Microprocessors and Interfacing
Digital Design
Computer Programming (C & C++)

CERTIFICATIONS
Algorithmic Toolbox
(University of California, San Diego)
Applied Machine Learning in Python
(Michigan University)

SKILLS

PROGRAMMING
Over 2000 lines
- C++ • Python • PHP
- HTML/CSS • Bootstrap • NodeJS
- ExpressJS • Javascript
- Java&Spring boot

Over 1000 lines
- C • Algorithms • Kafka • React-native
- Git • SQL • MongoDB

Basic:
- Django • Machine-Learning • OpenGL
- Bash • ElasticSearch

CO-CURRICULARS

- Avid reader
- State Chess player
- Seasoned Nature Lover
- National Level Yoga Medalist

EXPERIENCE

PHENOM PEOPLE
Product Development Engineer
March 2024 - Present | Hyderabad
- At Phenom, I manage **5-6** pages in a core portal, providing user analytics and AI insights impacting **10+ teams**. I oversee a backend stack with Kafka streams, supporting over **5 lakh** users for clients like Walmart, Cigna, Mastercard, IDFC Bank, and DHL. Led the migration from a monolithic Spring service to **6** microservices, increasing developer productivity by **30%** with minimal disruption.
- Streamlined **16** Kafka topics, some with **50-60** fields, into a unified service, reducing client onboarding time by **70%** and developer task time from **8-10 hours** to **2 hours**, automating processes and boosting team productivity.

AMAZON
Software Development Engineer
Jul 2022 - Oct 2023 | Bangalore

- Globally impactful software developer (**30+ countries**), architecting a secure login & auth API used by **20+ teams & clients**, streamlining user access & boosting collaboration. Skilled in Java, Spring, React Native, & JS frameworks, with expertise in RESTful APIs & Python scripting for optimized workflows.
- Streamlined communication and problem-solving across 5+ teams by bridging gaps and implementing effective cross-functional strategies; enhanced productivity by automating manual operations through scripting, resulting in a **time savings of 10+ hours per week**.

AMAZON
Software Development Intern
Jan 2022 - Jun 2022 | Chennai (WFH)
- Leveraged Spring Boot & Spring controllers to build 15+ robust API endpoints within Appstore Tablet-Only Tech's MVC framework, supporting **5 million+ global customers** for a seamless user experience.
- Streamlined operations via package management, automated pipelines & exercises. Developed 15+ proactive monitoring alarms, continuously identifying & fixing issues across launches & releases (3 high, 15+ low priority).

HDFC LIFE
Backend Web developer
Jun 2021 - Aug 2021 | Mumbai
- Developed a cutting-edge MERN stack API for a brand-new Medical Easy service, that aided in the transition of at least **20 million clients'** offline workloads to self-service automated flow. Launched successfully to public in September 2021.
- Utilized MySQL for efficient data handling and ensured quality through extensive unit testing and Postman validation.

PROJECTS

AMAZON WEBSITE CLONE | Backend Developer
April 2021 - May 2021
Engineered and stress-tested highly scalable API for Amazon like e-commerce platform using NodeJS, ExpressJS, MySQL and MVC architecture. API demonstrated ability to handle 10 concurrent requests per user for a user base of 1 lakh customers.
